

Depuratum is a food supplement in the form of a syrup composed of a selection of standardized extracts of high-quality plants that provides effective support for the physiological purification of the body.

DESCRIPTION

It is a product indicated for cyclical use throughout the year, in spring and autumn, helping the body to better adapt to seasonal changes. A body cleansing is also appropriate after periods of convalescence, overeating and before any specific therapy.

Importance of debugging

Our health is closely related to the body's ability to eliminate metabolic waste products - these substances are commonly called toxins.

Overeating or following a particularly high-fat diet, leading a sedentary lifestyle, abusing alcohol, smoking and medications create a build-up of toxins within the body that can compromise the normal function of the excretory or emunctory organs (liver, intestine, skin), leading to a general imbalance and the appearance of disorders that negatively affect the quality of life:

- Difficult digestion.
- Intestinal disorders.
- Dirty skin.
- Dull and brittle hair.
- State of drowsiness and heaviness.

Helping our body in the cleansing process is the best way to restore natural physiological balance. Toxin elimination must be carried out in an appropriate manner: first neutralizing them and then eliminating them. For this reason, food supplements that can help with cleansing must be intelligently formulated to allow their effective elimination.

Get to know the plants included in Depuratum

A complete cleansing can be the beginning of recovery from any disorder. The plants contained in Depuratum have been chosen for being ideal for helping to cleanse the different organs.

Known properties of some of the plants included in Depuratum

- Promotes liver functions, thanks to the presence of plants such as milk thistle, dandelion and fumitory.
- It helps in digestive processes, due to the presence of the artichoke.
- It supports diuresis and promotes the drainage of body fluids, thanks to the presence of sarsaparilla.
- It promotes intestinal transit thanks to the presence of tamarind.
- Promotes skin well-being thanks to the presence of burdock.

Thanks to the synergy between the plants selected in the formula and the benefits recognized in these plants, Depuratum is an ideal food supplement for those who wish to carry out a complete purification.

Presentation: 200 ml bottle of syrup.

1 daily dose of 10 ml contains:
