

## Spary BIO Children's Sunscreen SPF50 150 ml

EAN: 3700343096223    FABRICANTE: ACORELLE

*Formulated without perfume and based on a mineral filter, this spray is ideal for protecting the sensitive skin of children and adults from 3 years old.*

### DESCRIPTION

#### A FRIENDLY FORMULA FOR CHILDREN'S HEALTH

This SPF50 children's sun spray provides instant high protection against UVA and UVB rays. As a guest star, a 100% mineral filter of natural origin that remains on the surface of the skin and does not cross the skin barrier (specific ex vivo test carried out by an independent laboratory).

Children's solar capital is preserved thanks to a combination of protective and antioxidant active ingredients that prevent deep damage caused by sun exposure: Api Oléo Actif?, a patented complex derived from pollen and propolis that fights against the formation of free radicals, and organic Karanja Oil, used in Ayurvedic medicine for its extraordinary properties. Added to this combination, raspberry seed oil and organic turmeric extract help to deeply nourish the skin and soften it.

#### PRACTICAL AND ENJOYABLE SUN PROTECTION FOR THE WHOLE FAMILY

This Children's Sun Spray SPF50 is the ideal sun protection to protect the whole family, thanks to its economical 150 ml format. The fluid texture applies very easily and penetrates quickly for a result without white effect, without greasy residue and non-sticky. Its fragrance-free formula with a high protection index has been specially designed for the sensitive skin of adults and children over 3 years of age.

It can be applied to both the body and the face, and is waterproof so you can enjoy outdoor activities in complete safety. Its trigger pump allows for generous, quick and easy application, especially for the little ones. Anyone who has had to pet a small child on the beach wanting to go play will know how much fun it will be.

#### PROTECTING THE ENVIRONMENT: A PRIORITY

A carefully studied natural formula without any derivatives of petrochemical origin. All ingredients are biodegradable. Thanks to the Titanium Dioxide coating with an inert and hydrophobic material, the formula is highly resistant to water, which allows almost all of it to remain on the surface of the water, thus preserving the oceans and corals. The time has come for a non-synthetic filter of mineral origin that respects marine flora and its diversity.

- TOCOPHEROL: antioxidant agent ? vitamin E.
- CURCUMA LONGA (TURMERIC) ROOT EXTRACT\*: Organic turmeric extract with antioxidant and protective properties.

### TIPS FOR USE

Shake before using.

Apply the protective product before exposing yourself to the sun and reapply frequently to maintain protection, especially after sweating, swimming or towel drying.

Apply a sufficient amount of product (2 mg/cm<sup>2</sup> of skin). Reducing this amount would significantly reduce the level of protection. Do not spray directly on the face.

Avoid contact with the eyes. Choose a protection factor adapted to your skin type.

Even with protection, avoid exposure to hours of maximum sunlight (between 12 and 4 p.m.) and prolonged exposure.

Not suitable for children under 3 years old. Do not expose babies and small children directly to the sun.

Overexposure to the sun is a serious health threat. It is strongly recommended to wear a hat, sunglasses and covering clothing during exposure.
