

PuripHy drops to alkalize 60 ml

EAN: 8437013941044 **FABRICANTE:** ALKALINECARE

60 ml

Enjoy the benefits of alkaline water up to 9.5 pH wherever you are with just a few drops of PuripHy. In addition to alkalizing water without altering its flavor, it allows great versatility to alkalize other drinks such as coffee and tea.

DESCRIPTION

Includes 60 ml for a use of 200 liters.

100% natural and vegan.

Enjoy the benefits of alkaline water wherever you are with just a few drops of PuripHy without altering its taste. You can also alkalize other drinks like coffee and tea.

PuripHy is a bottled water purifier that combines sodium bicarbonate, potassium bicarbonate and potassium hydroxide.

This high-concentration formula is the most advanced on the market, being so powerful that it only requires 6 drops to alkalize 1 liter of water and raise the pH to 9.5 (instead of 10-20 drops, as other products require) . This implies great economic savings both due to its concentration and its long duration.

PuripHy is an oxygen catalyst, which helps the blood absorb more oxygen from the water you drink. This is achieved since PuripHy optimizes water by decreasing hydrogen ions and increasing hydroxyl ions.

Benefits of consuming PuripHy:

Helps improve the hydration power of water.

Its antioxidant properties contribute to the neutralization of free radicals in the body.

Helps preserve the youth and elasticity of the skin thanks to its anti-aging effect.

Promotes the assimilation of nutrients in the body.

It promotes the elimination of fluids retained in the body thanks to its potassium content.

Helps balance blood pressure.

Helps buffer stomach acids that result from excess hydrochloric acid.

Effective in weight loss diets along with a plant compound.

Characteristics:

Effectiveness: With just 6 drops per liter of water it raises the pH up to 9.5.

It does not alter the taste of the water, allowing it great versatility.

100% natural and vegan.

Puriphy drops to alkalize 60 ml

EAN: 8437013941044 **FABRICANTE:** ALKALINECARE

60 ml

Pharmaceutical quality with FDA and GMP certificate.

National Pharmaceutical Code CN 179171.9.

Made in Europe.

Benefits of Puriphy for practicing sports

Don't settle for simple hydration! Puriphy activates your power with every sip:

Boost your resistance

Facilitates optimal recovery

Gives you deep hydration

Alkaline water is not just water; It is the key to reaching your maximum potential!

Ingredients: Deionized water, potassium carbonate, sodium bicarbonate, potassium hydroxide.

Nutritional information:

	in 0.3ml	In 1.2ml	NRV*
Potassium	83.4mg	333.6mg	16.68%

Origin: EU.

- Keep in a cool and dry place.
- Do not exceed the expressly recommended daily dose.
- Food supplements should not be used as substitutes for a balanced diet.
- Keep out of the reach of little kids.

SUGGESTED USES:

The consumption of Puriphy is recommended as follows depending on the liquid with which you want to mix it:

- Add 6 drops of Puriphy per liter of drinking or cooking water.
- Add 5 drops to the coffee.
- Add 2 drops to the tea.

Prices valid except for changes on our website. (IVA/VAT) included. Doc. Version bf-trf-G-20241203

Puriphy drops to alkalize 60 ml

EAN: 8437013941044 FABRICANTE: ALKALINECARE

60 ml

How does Puriphy work?

Alkalize the water you drink every day with a few drops of PuripHy. By adding these drops to drinking water, we achieve a pH of 8 to 9.5. Its prolonged use facilitates the elimination and neutralization of toxic acids in the body, while increasing the hydration power of water. PuripHy allows you to drink alkaline water with greater hydrating capacity since it reduces the size of the clusters (molecular groupings of water) allowing water to better penetrate the cell. PuripHy is a bottled water purifier. With just a few drops PuripHy acts as an antioxidant. Additionally, it is an oxygen catalyst, which helps the blood absorb more oxygen from the water you drink. This is achieved since PuripHy optimizes water by decreasing hydrogen ions and increasing hydroxyl ions.

Who can take PuriPHy?

PuriPHy, the bottled water purifier, can be taken by all adults and children, pregnant women and nursing mothers since we are only ingesting water with the same level of minerals as our own body.

What are alkaline drinks?

There are many drinks considered alkalizing due to their pH. For example: 1. Alkaline water. 2. Lemon juice. 3. Green tea. 4. Infusions: chamomile, ginger and dandelion. 5. Vegetable juices or vegetable broths.

How can you make alkaline water?

You can make alkaline water in different ways: 1. Add half or a teaspoon of Phour Salts mineral salts to the water. 2. Add chopped lemon and Himalayan salt to the water. 3. Add drops of Puriphy pH to the water. 4. Use an ionizing filter.
