

Filter alkanatur drops

EAN: 362932

FABRICANTE: ALKANATUR

The Alkanatur Drops Filter offers multiple benefits to improve water quality: This filter carries out a process of purification, alkalization, hydrogenation and ionization of water.

DESCRIPTION

The Alkanatur Drops Filter is the key to obtaining quality water and health benefits:

- This filter guarantees alkaline water with antioxidant properties, which help balance the body's pH and fight free radicals.
- Efficiently removes various water pollutants in high percentages, such as chlorine, heavy metals, microplastics, trihalomethanes, nitrites, bacteria, pesticides and fluorides.
- It alkalizes the water up to a pH of 9, providing an alkaline effect for the organism.
- In addition to alkalizing, the filter also hydrogenates, ionizes, restructures and vitalizes the water, improving its quality and beneficial properties.
- The plastic used in the Alkanatur Drops Filter is certified as free of toxic substances by the IBS of Granada, providing peace of mind in terms of its safety and quality.
- Add magnesium to the water with a concentration of 18mg/L, providing an essential mineral for the well-being of the body.
- This filter does not use ion exchange resin, offering an ecological and chemical-free alternative.
- Made in Spain, the Alkanatur Drops Filter combines quality, innovation and design, offering a reliable and locally sourced product.

The Alkanatur Drops Filter is the perfect option to enjoy quality water, with alkaline and antioxidant properties, eliminating contaminants and improving your general well-being. Its design and manufacture in Spain guarantee high standards of quality and reliability.
