

Pack of 3 alkanatur drops filters

EAN: 8425402247730 **FABRICANTE:** ALKANATUR

The pack contains three filters for the jug.

DESCRIPTION

The three Alkanatur Drops filters offer a complete solution to filter and purify water effectively. Here I present its main features:

1. **Advanced filtration technology:** Thanks to Alkamicronized selective® technology, these filters are capable of purifying up to 400 liters of water (for each filter) efficiently eliminating unwanted elements such as chlorine, fluorine, pesticides, nitrates, heavy metals (lead, mercury, cadmium, copper, aluminum and arsenic) and trihalomethanes. With this filtration process, we guarantee obtaining high quality water free of impurities.
2. **Contribution of antioxidants and hydrogen:** Alkanatur Drops filters not only purify water, but also provide antioxidants and hydrogen thanks to their cutting-edge technology. These elements are beneficial for health and contribute to maintaining a balance in the body.
3. **Protection against harmful bacteria:** Alkanatur Drops filters are designed to prevent the reproduction of dangerous bacteria such as Escherichia coli, Pseudomonas aeruginosa, Clostridium perfringens and coliform bacteria. This ensures that the filtered water is free of harmful microorganisms and is safe for consumption.
4. **Quality certifications:** Our filters are certified and comply with the most demanding European quality standards. In addition, they are in accordance with Royal Decree 140/2003, which establishes the sanitary criteria for the quality of drinking water.

In summary, the three Alkanatur Drops filters offer a complete water filtration and purification solution. In addition to eliminating various undesirable substances, they provide antioxidants and hydrogen and guarantee the elimination of harmful bacteria. You can trust the quality and safety of these filters, backed by recognized health certifications and regulations.
