

Shower filter 50,000 liters

EAN: 8425402490860 FABRICANTE: ALKANATUR

The Alkanatur replaceable shower filter (50,000L) is an ecological filter certified as 100% free of calcium sulfite E 226, it removes up to 99% of chlorine and heavy metals from water.

DESCRIPTION

The Alkanatur filter's two-phase filtering system uses a combination of materials to guarantee water purification:

In phase 1, PP cotton is used to retain particles and sediments present in the water, ensuring effective filtration at this initial stage.

In phase 2, activated carbon fiber is used with a patented system, which has the ability to adsorb and remove impurities, such as chlorine, organic compounds and other contaminants present in the water.

This filter system is ecological and is certified as 100% free of calcium sulphite E 226*. In addition, it is certified by the CACTI (Center for Scientific and Technological Research Support) belonging to the University of Vigo, guaranteeing its quality and efficiency in water purification.

With the Alkanatur filter, you can have the peace of mind of enjoying clean and pure water thanks to its two-phase filtering system backed by cutting-edge technology and certifications.

Alkanatur's replaceable internal filter offers an effective solution to improve the quality of the water you consume:

- Eliminates up to 99% of chlorine and heavy metals present in the water, providing cleaner and safer water to drink.
- It disinfects the water, eliminating impurities, bad odors and organic matter, which results in fresher water that is more pleasant to the palate.
- The internal filter is easily replaceable, allowing you to maintain the efficiency of the filter system over time without the need to purchase a complete new device.

With Alkanatur's replaceable internal filter, you can enjoy quality water, free of chlorine, heavy metals and other impurities, providing a healthier and more pleasant hydration experience.

Shower filter 50,000 liters

EAN: 8425402490860 **FABRICANTE:** ALKANATUR

The Alkanatur filter system is designed to adapt to different types of facilities, providing versatility and ease of use.

In addition to purifying water, this system has benefits for hair and skin care. Helps improve the appearance and health of hair and skin, helping to reduce ailments such as dermatitis, psoriasis, eczema, among others.

A prominent feature of this system is that it includes a special reagent to measure the level of chlorine in the water. This allows you to know the quality of the water you are using and take appropriate action if necessary.

To provide users with confidence, the Alkanatur filter system offers a 30-day satisfaction guarantee. If for any reason you are not satisfied with the product, you can request a refund within that period.

It is important to note that many commercially available filters contain the additive E226, also known as calcium sulfite, which comes in the form of white ceramic balls. However, this additive is considered highly toxic to health. In contrast, the Alkanatur filter system is free of this additive, guaranteeing a safe and healthy option to purify the water you consume.

Product content:

1. Complete **shower filter**

A 50,000 liter shower filter.

It is fully assembled (housing + internal filter + pre-filter) and ready for installation.

2. The replacement shower pre-filter performs several essential functions:

- Collects the most solid impurities present in the water, such as remains of organic matter, grit, earth, and other sediments. This helps keep your shower water cleaner and free of unwanted particles.
- Protects the internal filter that is located in the internal part of the shower filter system. The internal filter is responsible for purifying the water, removing chlorine, heavy metals and other unwanted substances. The pre-filter acts as an additional barrier, preventing solid impurities from clogging or damaging the internal filter.

3. Chlorine reagent

A chlorine reagent to be able to know the amount of chlorine in your shower water or any liquid in an easy and safe way.

How to use:

Pour 5-6 drops of Alkanatur chlorine reagent into 15 ml of water and compare it with the color scale that goes on the box.
