What is Aquilea Forte Dol Joints used for?

Aquilea Forte Dol tablets are used to help the mobility and flexibility of the joints.

What uses does Aquilea Forte Dol Joints have?

Aquilea Forte Dol articulations is indicated to maintain the flexibility and mobility of the joints. It is also indicated for the normal functioning of cartilage, bones and skin.

What is the composition of Aquilea joints Forte Dol tablets?

Active ingredients per daily dose: Type II Bioactive Collagen (40mg), Turmeric Extract (300mg), Boswellia Extract (100mg), Vitamin C (12mg), Pepper Extract (5mg).

Type II bioactive collagen is a protein whose structure is the same as the collagen found in joints and in the connective tissue of cartilage. Collagen is a protein found naturally in cartilage, skin, and bone. Therefore, collagen contributes to the maintenance of bones and cartilage. Boswellia and Turmeric are important for joint mobility and flexibility. Hyaluronic Acid lubricates and moisturizes the joints so it is essential for the flexibility of joints and cartilage. Vitamin C contributes to the formation of collagen for the proper functioning of cartilage, bones and skin.

Consult your doctor or pharmacist in case of liver or biliary problems or in case of simultaneous taking of anticoagulants.
