Foundation year: 1939

Argenol manufactures active ingredients from silver, gold and platinum. Argenol manufactures products for the pharmaceutical and cosmetic industries with silver, due to its antimicrobial properties. Argenol offers antimicrobial solutions to fight against a broad spectrum of bacteria, thus preventing infection and bacterial growth.

DESCRIPTION

Argenol Laboratories uses silver as a broad-spectrum antimicrobial agent in the production of its products, the efficacy of which has been widely proven against the most harmful microorganisms that appear in everyday life, such as E. coli, Legionella, Pseudomonas, Salmonella, S. aureus, A. niger, among others.
