Foundation year: 1979

Country: IT

Web: <https://www.argital.it/en/>

Argital is a company dedicated to the production of cosmetics with natural and sustainable active ingredients. They manufacture cosmetic products, plant-based creams, cosmetic products for animals, household detergents, and supplements.

DESCRIPTION

Argital was born in Milan in 1979. They studied the properties of green clay for years and developed formulas for natural cosmetics designed for health and well-being. Therefore, its natural cosmetics are based on green clay.

Argital products are made exclusively from **green clay** and other selected natural ingredients.

The fragrances are obtained from pure essential oils.

In 2005, the company moved to Sicily, to a sunny, windy and clean place facing the Mediterranean Sea, precisely because that way they would be close to the well from which the green clay is specially extracted.
