Aserceli is dedicated to the food sector for people with celiac disease. Aserceli ensures quality gluten-free products at all times.

DESCRIPTION

Gluten is a protein found in each and every form of wheat, rye, oats, barley, and related hybrid cereal grains. When people with celiac eat gluten, the microvilli of the small intestine are damaged, preventing the absorption of essential nutrients. Aserceli guarantees that none of its products are gluten-free, therefore suitable for people with celiac disease.
