

Light Brown Touch Up Spray

EAN: 8030243011749

FABRICANTE: BIOKAP

BioKap Spray Touch Up is the practical and fast solution to have an impeccable and uniform colour between hair touch-ups for longer. It covers the hair roots with a natural and even effect, in an instant, as you would with a new dye. It is quickly absorbed, leaves no residue and shampoo is enough to get rid of it.

DESCRIPTION

Its formula with natural extracts not only dyes the hair, but also takes care of the beauty of the hair and skin, nourishing and regenerating it.

In fact, it contains Tricorepair, a complex based on rice proteins with a restructuring action, tridecyl salicylate, a willow derivative that protects hair from UV rays and discoloration, and lipophilic acids from fruits.

The formula is also enriched with Panthenol (Vitamin B5) to provide hydration and protection to the hair and organic Argan oil, to help prevent hair dryness.

The small bottle is practical and compact, making it ideal to carry with you at all times.

When to use

To instantly cover roots between dyes, ensuring an even result. Spray Touch Up is ideal for looking perfect in all circumstances.

How to use

- Shake the bottle well.
- Spray the product about 15 cm from the area to be covered, the spray will create a uniform color.
- Wait a minute before touching your hair.
- Slowly comb your hair for a more natural effect.
- It is a light, non-staining spray, a normal shampoo is enough to get rid of it.

How to remove it

It is a light spray that does not stain, to remove it just wash with shampoo.
