High levels of cholesterol, triglycerides and poor circulation can lead to altered functionality of the arteries. Arteries are blood vessels that carry blood from the heart to the rest of the body. Varimore is a combination of natural active ingredients and vitamins B3, B2, B1, vitamin C with antioxidant activity (EFSA: 129, 138, 143, 148, 3331) and vitamin K that contributes to normal blood coagulation. (EFSA: 124, 126)

DESCRIPTION

Combination of natural active ingredients and vitamins B3, B2, B1, vitamin C with antioxidant activity (EFSA: 129, 138, 143, 148, 3331) and vitamin K that contributes to normal blood coagulation. (EFSA: 124, 126). Backed by scientific studies.

Studies carried out by the Faculty of Chemistry of the University of Murcia:

Studies carried out at the Faculty of Chemistry of the University of Murcia have determined that it contains:

- 11 Volatile active ingredients with spasmolytic (47% of the total volume), antimicrobial, antioxidant and anti-inflammatory function.
- 917 mg of total polyphenols per 100 grams with an antioxidant capacity equivalent to 31,300 VCEAC (194 times more than the same amount of grape pulp). Each capsule of Varimore has an antioxidant action equivalent to 200 mg of Vitamin C. This action reduces oxidative stress, hindering the formation of atheroma plaques, by obstructing the first step of their formation, which is the oxidation of the lipoproteins present in the arteries. .
- It has an anti-inflammatory effect due to the inhibition of 36.1% of 15-Lipoxygenase, inhibiting the production of leukotrienes and lipoxins. Reducing discomfort in the extremities and inflammation of blood vessels.
- Antithrombotic action produced by the active ingredients Nattokinase and Astaxanthin that also improve cholesterol metabolism and reduce Blood Pressure, preventing vascular accidents.
- VCEAC: Vitamin C Equivalent Antioxidant Capacity.

Sometimes plaques form on the inner layer of the arteries, preventing proper blood flow. If one of these plaques ruptures, the artery becomes obstructed or a thrombus may block a blood vessel due to the
