

## CPNI - 9/11 60 Capsules

EAN: 8711827076155    FABRICANTE: BONUSAN

*Bonusan cPNI-11S, thanks to Curcuma longa, contributes to the protection of cells against oxidative damage, to the normal functioning of the immune system, to maintaining normal liver function and to the normal functioning of the nervous system. Vitamin E also contributes to the protection of cells against oxidative damage.*

### DESCRIPTION

The Bonusan cPNI line has been specially developed for healthcare professionals and is widely used in treatment plans. With this formula, it contributes to the normal functioning of the nervous and immune systems thanks to Curcuma longa.

Turmeric and vitamin E help protect cells from oxidative damage. Resveratrol is one of the best-studied polyphenols and, together with adrenal concentrate, completes the formula.

### Why does it contain turmeric and vitamin E?

Turmeric is best known as a culinary spice, also known as turmeric. The turmeric plant contains various curcuminoids, of which curcumin is the most common. In recent decades, it has been studied in great detail by scientists. Turmeric contributes, for example, to the normal functioning of the nervous system.

Vitamin E, also called tocopherol, is the most important fat-soluble antioxidant, and is found primarily in the cell membranes of our tissues and the brain. Vitamin E contributes to the protection of cells against oxidative damage.

### What is resveratrol?

Resveratrol is one of the best-studied polyphenols. Polyphenols are found mainly in organic fruits, vegetables and herbs. Resveratrol can be found, for example, in the skin of red grapes ( *Vitis vinifera* ). Another important source is Japanese knotweed ( *Polygonum cuspidatum* ), a plant that has been used since ancient times in traditional Chinese medicine.

### What exactly does cPNI-11S do?

Bonusan CPNI-11S contributes to the protection of cells against oxidative damage thanks to vitamin E. *Curcuma longa* contributes to the normal functioning of the immune system and, in addition, to the normal functioning of the nervous system.
