Food supplement for maintaining normal bones.

DESCRIPTION

What is Bonusan Osteoyl and what is it used for?

Bonusan Osteoyl contains magnesium and vitamins C and D. This balanced formula therefore contributes to the maintenance of normal bones. It also contains calcium, which is necessary for the maintenance of normal bones.

- Magnesium and vitamin D contribute to the maintenance of normal bones. Calcium is necessary for the maintenance of normal bones.
- Contains several adjuvant ingredients, such as vitamin C, which contributes to the normal formation of collagen for the normal functioning of cartilage.
- Completed with minerals that also contribute to the maintenance of bones in normal conditions, such as zinc and manganese.
- Since highly effective forms of magnesium and calcium are used, the tablets are not too large and can be easily swallowed.
