

Organic oil packaged in a 3 liter can. This high quality oil has been obtained through a mechanical, natural and selective process.

DESCRIPTION

The Organic Oil in a can is a superior organic **Extra Virgin olive oil**, obtained directly from olives and only through mechanical cold extraction procedures to achieve the best flavor.

It is an ecological oil that is packaged in 3-liter capacity bottles, ideal for the average consumer.

The oil obtained through this type of agriculture is much more natural and quality. We use the different varieties of olives we have: arbequina, cuquillo, picual, royal and others to make a balanced oil, with a lot of personality and stable. The result is a thick, velvety, very aromatic oil, with a mild spicy touch and a certain herbaceous flavor, perfect for giving a touch of flavor to meals and ideal for all diets.

How is this Organic Oil obtained?

This organic oil has been obtained through biodynamic agriculture, an organic agriculture based on a very high quality process that ensures the guarantee of this thick oil with an excellent flavor. This type of agriculture is much more natural and much more demanding with the use of any product that is not natural. It covers different aspects: economic, ecological and social, since it uses healthy agricultural techniques, and is based on principles such as diversification, recycling, exclusion of chemicals, decentralized production and distribution, etc., shared by other biological movements. This model for obtaining oil has been applied at Casa Pareja for more than 10 years and guarantees a product of high quality and, above all, good flavor.

Casa Pareja oil is the result of careful cultivation and personalized processing of the olives for quality and well-being. The Organic Oil in a 3L can. It is a product made and packaged by Casa Pareja.
