

CERA VE

Address: Calle Alcalá, 546

Postal Code / District: 28027

Town: Madrid

Province: Madrid

Phone: 911778000

Foundation year: 0

Country: ES

Web: <https://www.cerave.es/>

The CeraVe story begins in 2005 after experts noticed that several skin conditions such as: acne, eczema, psoriasis and dry skin, had something in common: a dysfunctional skin barrier. Developed with dermatologists, CeraVe offers a complete line of skin care products enriched with a blend of 3 essential ceramides (ceramides 1, 3 and 6-II), fatty acids and other lipids to help repair and strengthen the skin's natural barrier. fur.

DESCRIPTION

SKIN SCIENCE

A revolutionary delivery system called MultiVersicular Emulsion Technology (MVE) was developed that releases moisturizing ingredients for 24 hours, layer by layer. It is the only skin care line that contains 3 essential ceramides plus a patented technology (MVE). Our patented MVE technology is a sphere that slowly dissolves, releasing each ingredient, so the product continues to work after application. The combination of the 3 essential ceramides helps relieve dry skin, reduce moisture loss, increase hydration levels and restore the skin barrier.

Developed with dermatologists

CeraVe is the #1 Dermatologist Recommended brand for Hydration. It doesn't matter if you need products for sensitive, combination, normal, acne-prone skin or pathologies such as eczema, psoriasis or keratosis pilaris, CeraVe can help you.

The ceramide difference

All CeraVe products contain 3 essential ceramides which are lipids that form the skin's protective barrier and help retain moisture. Skin naturally contains ceramides that can be lost over time, contributing to dryness and irritation. Replenishing ceramide levels helps restore the skin barrier, sealing in moisture and warding off impurities and irritants.
