

Manuka honey UMF 15+ 250 g

EAN: 9400501005558 FABRICANTE: COMVITA

Comvita manuka honey stands out for its thickness and for having a high UMF value (+15). It has a much darker coppery colour and its flavour is slightly more bitter than most honeys.

DESCRIPTION

Benefits

Honey is an excellent concentrated source of energy and contains a large amount of vitamins, minerals and organic acids. As a result, it provides a powerful antioxidant effect and helps regulate intestinal transit.

Natural Ingredients

Manuka honey is derived from the nectar of the New Zealand tea tree. All of the honey we make has been tested by the Active Manuka Honey Association (AMHA) to ensure it contains the stated UMF level.

Instructions for use

We recommend taking 1 or 2 tablespoons (10 g) half an hour before meals. You can also use it to spread on bread or toast and it should be stored at a temperature below 25°C.
