The Algamar Group, founded by brothers Clemente and Fermín Fernández Súa, is the first Spanish company to collect and market organic algae. After a professional career of 25 years, with Delialga he takes the step into mass consumption channels to democratize BIO algae.

DESCRIPTION

Philosophy

The philosophy of the entire Algamar Group is to take care of the planet. Thanks to our strong ecological commitment, we are a sustainable and environmentally friendly company, from the manual collection of algae to its preparation for marketing.

Ecological coherence

For ecological coherence, we have high-efficiency solar panels in our facilities that allow us to generate electricity in a clean and renewable way. The dryers have a system of biomass boilers, fed with forest remains from the area. Books and catalogs are printed on FSC certified ecological paper. And we are also committed to new biodegradable and compostable packaging.
