

Endolgie 30 Tablets

EAN: 5605481108648 FABRICANTE: DIETMED

Headache. Reduces pain and inflammation. Anti-inflammatory and analgesic.

DESCRIPTION

Headache is one of the most common health problems. Organic headaches have a variety of causes that can be grouped into two main classes: extracranial and intracranial. Extracranial headaches may be caused by inflammation of the paranasal sinuses, dental irritation, temporomandibular joint disorders, ophthalmologic disorders, or tension in the movement of the head and neck. Intracranial headaches may result from inflammation of the brain or meninges, vascular problems, mechanical aggression, or tumors. Tension headaches consist of tension of extracranial muscles that produce a dull, persistent pain in the forehead, temples, neck, or throughout the head. Tension headaches are associated with stress, fatigue, and posture. Migraine headaches include migraines. Both chronic and occasional headaches can cause suffering and distress, but they rarely represent a serious health problem. However, any change in the pattern or nature of the headache may be a symptom of a serious problem, such as sporadic pain that becomes more frequent or that goes from mild to severe.

Endolgie Rapid is an inflammation modulator and analgesic, which reduces pain and inflammation through its formulation. A natural solution for pain, particularly for headaches.

Indications

In case of headache, tension or migraine.
Anti-inflammatory and analgesic action.

Ingredients

Bulking agent: microcrystalline cellulose, *Harpagophytum procumbens* DC (Harpagophytum; Dry extract of the secondary roots containing at least 4% harpagosides), *Salix alba* (White Willow; Dry extract of the bark, containing at least 10% salicin), *Boswellia serrata* (Boswellia; Resin extract containing at least 60% boswellic acid), *Tanacetum parthenium* (Tansy; Dry extract of the aerial parts containing at least 0.2% parthenolides), L-ascorbic acid, anti-caking agents: magnesium salts of fatty acids, silicon dioxide.
