

Fintuss Cough Syrup Children

EAN: 8420101216698 FABRICANTE: ELADIET

Food supplement to treat both dry cough and productive cough. For children from one year.

DESCRIPTION

What is Fintuss Syrup for children and what is it used for?

It's a children's cough syrup. In the case of dry cough, it forms a soothing film that soothes irritation and protects the mucosa from irritating agents. When it comes to a productive cough, it helps to hydrate the mucus, making it easier to expel.

It is suitable for children from 1 year old and comes in a pleasant strawberry flavour, with active ingredients of natural origin that promote effective cough relief.

This syrup has a double benefit for the health of the mucosa. First, it creates a protective layer that adheres to the mucosa, providing it with an effective defense against irritating agents. In addition, it provides a calming effect by moisturizing the mucosa, thus counteracting the irritation caused by a dry cough. Likewise, it contributes to the hydration and elimination of mucus, facilitating its expulsion.
