EAN: 8420101216070

FABRICANTE: ELADIET

Food supplement based on golden sun, black currant, reishi, turmeric, vitamins and minerals. To strengthen the immune system.

DESCRIPTION

What is Sol de Oro and what is it for? Eladiet's Sol de Oro Forte is the golden ally to strengthen your immune system against allergens, such as dust, pollen, mites. Sol de Oro, is an ancient plant native to the Italian peninsula, awakens the power of your immune system by stimulating the adrenal glands. This unleashes a formidable action in your fight against allergies, with two powerful weapons: Anti-inflammatory Action: Put out the flames of inflammation by blocking the formation of substances that fan the fire of the immune response. Immunomodulation: Orchestrate the symphony of your T lymphocytes, the directors of the immune system, to maintain harmony in your body. The Black Currant joins the battle with its multiple active ingredients, from anthocyanins to essential fatty acids. Stimulates the release of cortisone and cortisol, the gatekeepers that: Defeat prostaglandins, the agitators of inflammation. They silence histamine and pro-inflammatory cells, killing allergic symptoms and inflammation. Turmeric, with its powerful curcumin, is another warrior. She: Suppresses the immediate allergic response by inhibiting immunoglobulin E, the allergic antibody. Stops the release of histamine, the nightmare of allergy sufferers. Reduces the population of proinflammatory cells such as eosinophils and macrophages. Reishi, the magic mushroom, enters the scene. Its unique polysaccharides and other assets do two key moves: Suppresses histamine, relieving allergies and asthma. Harmonize your immune system with its immunomodulatory action, defending yourself against allergies. Minerals join the fight: zinc, manganese and copper. Zinc calms your immune system, preventing exaggerated allergic responses. Manganese is the star of the trace elements in your immune system. And copper, your protector against toxic agents. And finally, vitamins C, D and B6 become your allies. They keep your immune system in top shape, from childhood to adulthood. Vitamin D is effective against allergies such as atopic dermatitis and allergic asthma.
