

Lombrifin Syrup 250 ml

EAN: 8420101212850 FABRICANTE: ELADIET

Lombrifin is a syrup that is used to treat intestinal worm infections. Food supplement in syrup made from concentrated melon and pomegranate juices, for digestive well-being.

DESCRIPTION

What is Lombrifin and what is it for?

Lombrifin is a **syrup** that is used to treat intestinal **worm** infections, especially nematodes such as Ascaris and Pinworms.

It acts in two ways: first, it directly kills the worms and, second, it paralyzes the nervous system of the worms to facilitate their expulsion from the body.

An important advantage of Lombrifin is that it is made from low-toxic and non-irritating plant extracts, which makes it suitable for both children and adults.

The melon (*Cucumis melo*) is a fruit that belongs to the botanical family of Cucurbitaceae. It contains cucurbitacins, compounds believed to have anthelmintic properties against tapeworms and pinworms. In addition, its laxative effect makes it an effective remedy against intestinal worm infections.

"Pomegranate (*Punica granatum*), a member of the Punicaceae family, is a fruit that contains piperidine alkaloids, such as Pelletierine, which are highly effective against gastrointestinal parasites."

What are the ingredients in Lombrifin?

For 30ml:

- Concentrated pomegranate juice 18mg (60%).
- Concentrated melon juice 9mg (30%).
- Water.
- Papaya and carrot aroma.
- Acidulant: citric acid.
