Elie Health develops ingredients and products based on microbiota science and focused on intestinal health and nutrition. We are specialists in functional lipids with a multitude of applications and technical possibilities.

DESCRIPTION

E.L.i.E. Metchnikoff

Our history

The seed of ELiE was born through a project on nutrition and health where the science of microbiota and probiotics were the main axis and the connecting point. We soon realized how fascinating this field is and we immersed ourselves in its knowledge.

ELiE Health Solutions humbly wishes to honor Elie Metchnikoff, microbiologist and Nobel Prize winner in physiology in 1908, with its name.

A century ago he postulated the benefits of lactic acid bacteria in food and their role in health and longevity.
