Essential Oils Artri 60 Pearls

EAN: 8436612680101 FABRICANTE: EQUISALUD

- Extract rich in tocopherols (antioxidant), 2 mg.
- Wrapper: Gelatin and humectant (glycerin).

Juniper essential oil, *Juniperus communis*

Juniper essential oil is known for its anti-inflammatory and analgesic properties. It contains compounds such as alpha-pinene and limonene, which have been shown to have significant anti-inflammatory properties. These compounds act by inhibiting the action of proinflammatory enzymes, thus reducing the inflammatory response in the joints. Additionally, juniper can improve blood circulation, facilitating the transport of essential nutrients to joint cells and promoting the elimination of waste.

Cypress essential oil, *Cupressus sempervirens*

Cypress is recognized for its vasoconstrictor and anti-inflammatory properties. The α -pinene and β -3-carene present in cypress essential oil have been shown to have anti-inflammatory effects by modulating the response of the immune system. In addition, this essential oil can improve lymphatic circulation, which contributes to the elimination of toxins and reduction of swelling in joints affected by arthritic processes.

Turmeric essential oil, *Curcuma longa*

Turmeric is known for its active compound, curcumin, with anti-inflammatory and antioxidant properties. Curcumin has the ability to modulate various molecular pathways related to inflammation, inhibiting the activity of proinflammatory enzymes and reducing the expression of inflammatory cytokines. Likewise, it has been observed that turmeric can help prevent the degradation of cartilage in the joints, offering an additional benefit in arthritic conditions.

Ginger essential oil, *Zingiber officinale*

Ginger contains compounds such as gingerol, known for its anti-inflammatory and analgesic properties. These compounds work by blocking the production of pro-inflammatory substances, thus reducing inflammation in the joints. Additionally, ginger may help improve joint mobility by inhibiting the formation of free radicals that contribute to joint damage.

Myrrh essential oil, *Commiphora myrrha*

Myrrh has been appreciated throughout history for its anti-inflammatory and analgesic properties. It contains compounds that have been shown to inhibit the activity of inflammatory enzymes and reduce the inflammatory response. Myrrh can also help stimulate blood circulation, promoting the delivery of nutrients to joint cells.

Boswellia carterii frankincense essential oil

Frankincense essential oil contains boswellic acid, a compound with anti-inflammatory properties. This acid inhibits the action of enzymes responsible for cartilage degradation, providing a possible benefit in arthritic conditions. Additionally, frankincense may help reduce the sensation of pain by modulating pain signaling pathways in the central nervous system.

lemon essential oil

Lemon essential oil is known for its detoxifying and antioxidant properties. It contains limonene, a compound with anti-inflammatory properties that can help reduce inflammation in the joints. Additionally, lemon can contribute to alkalization of the body, helping to balance pH and reduce acidity, which has been linked to a lower risk of inflammation.

Does Essentials Oils Artri have contraindications?

Not recommended during pregnancy or breastfeeding, in children under 18 years of age, in women with a history of breast cancer, in case of severe kidney failure or alterations in liver or biliary function or gallstones.

Consult a specialist if you are taking anticoagulants or other medications and in case of heart problems. Do not use for a long time (maximum 14 days).
