FABRICANTE: EQUISALUD

Component

Extract rich in tocopherols (antioxidant)

Amount

2 mg.

Composition per pearl in mg.

Wrapping :

Gelatin and humectant (glycerin).

Juniper essential oil, *Juniperus communis*

Juniper is known for its diuretic and antiseptic properties. It contains compounds such as α -pinene and terpinen-4-ol, which have antimicrobial properties. These components can help fight infections in the kidneys and reduce the bacterial load in the urinary tract.

Frankincense essential oil, *Boswellia carterio*

Frankincense is valued for its anti-inflammatory properties. Its ability to reduce inflammation may be beneficial to the kidneys by relieving pressure on this vital organ. Additionally, frankincense can help improve blood circulation in the kidney area, thus contributing to better function.

Lemon essential oil, *Citrus x limon*

Lemon is recognized for its ability to detoxify the body and support kidney function. Limonene, a main component of lemon essential oil, has been shown to have antioxidant and anti-inflammatory properties that may help protect the kidneys against oxidative stress and inflammation.

Rosemary essential oil, *Rosmarinus officinalis*

Rosemary essential oil has diuretic properties that can promote the elimination of toxins through urine. In addition, cineole and rosmarinic acid present in rosemary have antioxidant and anti-inflammatory properties that can protect the kidneys and promote cell regeneration.

Sage essential oil, *Salvia officinalis*

Sage has antimicrobial and anti-inflammatory properties that may be beneficial for the kidneys. Its compounds, such as rosmarinic acid and cineole, can help reduce inflammation and fight possible infections, thus contributing to kidney health.

Pine essential oil, *Pinus sylvestris*

Pine essential oil is known for its diuretic and antiseptic properties. Its antiseptic properties can help prevent kidney infections.

Palmarosa essential oil, *Cymbopogon martini*

Palmarosa is prized for its cleansing and detoxifying properties. It can help eliminate toxins from the body, including those that affect the kidneys. Additionally, essential oil may have relaxing effects, which may be beneficial in reducing stress, a factor that can negatively affect kidney function.

Savory essential oil, *Satureja montana*

Savory is known for its diuretic and antiseptic properties. It can help increase urine production, contributing to the elimination of waste and toxins. Additionally, its antiseptic properties can help prevent urinary tract infections, thus protecting kidney health.
