

ARTRO VITALE 25 gr

EAN: 8023966201856 FABRICANTE: FORZA VITALE

Food supplement based on Harpagophytum, promotes normal joint function.

DESCRIPTION

MSM corresponds to Methyl-Sulfenyl-Methane and represents inorganic sulfur in its natural form, that is, as we find it in the sea, in the ground and in the atmosphere. Its presence in the human body is fundamental, since it represents the basis for the construction of the most important biomolecules, such as enzymes, amino acids, hormones and it takes part in the most essential metabolic processes of cells. Therefore, there are many functions that it performs, including the anti-inflammatory effect, thanks to which the organism is able to effectively repair damaged cells and tissues. All of this makes MSM a valid support against joint pain, tendonitis, inflammation of the mucous membranes or problems with the intervertebral disc and, generally, in the presence of musculoskeletal pathologies. MSM is also used in sports: athletes often suffer from stiffness and pain in ligaments, muscles or joints; constant administration helps in these contexts. Recent studies on humans indicate that organic MSM levels tend to decrease with age, probably due to the incipient metabolic slowdown. Therefore, proper supplementation is necessary, especially in old age.

Flax seed oil is an extremely rich source of essential fatty acids, useful in the prevention of many pathologies, used for a long time and famous for its multiple properties. Its chemical composition is around 50-60% Omega-3 essential fatty acid, also called linolenic or alpha-linolenic acid; 18-20% omega-6 acid, called linoleic acid and around 12-14% saturated fatty acids, such as palmitic and stearic. Its beneficial effects are due to a very broad spectrum of action and it is also used as an adjuvant in the treatment of rheumatoid arthritis.

Devil's Claw is a creeping plant native to Namibia and has been used for years as a bitter tonic, as an antipyretic for feverish states and digestive disorders; it is in fact famous for its hypocholesterolemic properties. Its active principles, harpagosides, of hiridoid nature, are responsible for the beneficial effects of the plant.

Early research by Professor Zorn of the Friedrich-Schiller Institute in Jena has shed light on the anti-arthritic properties of Devil's Claw root.

The strong anti-inflammatory effect is mainly due to a synergistic and simultaneous action of several active metabolites present in the phytocomplex. This effect is obtained thanks to β -sitosterol, which inhibits the synthesis of prostaglandins, which are responsible for the appearance of inflammation. The hiridoids present, on the contrary, interfere with the permeability of the cell membrane to ions and the harpagoside acts, finally, as an analgesic.

Ingredients

Prices valid except for changes on our website. (IVA/VAT) included. Doc. Version bf-trf-G-20241221

ARTRO VITALE 25 gr

EAN: 8023966201856 **FABRICANTE:** FORZA VITALE

MSM (Methylsulfonylmethane), microcrystalline cellulose, Flax (*Linum usitatissimum* L.) seeds, Harpagophyte (*Harpagophytum procumbens* DC.) rhizome, Vegetable magnesium stearate, Gum arabic.

Instructions for use

Adults (Recommended dosage for subjects of normal weight) 2 tablets three times a day.

Up to 12 years (Recommended dosage for subjects of normal weight) 1 tablet three times a day.
