

## Burdock Compost 100 ml

EAN: 8023966100067

FABRICANTE: FORZA VITALE

*Food supplement based on Burdock, useful for promoting skin purification.*

### DESCRIPTION

Burdock has diaphoretic, diuretic, purifying, detergent, liver function-stimulating and healing properties. This plant can be useful as an adjuvant in dermatitis, biliary stasis, hyperglycemia, pancreatic insufficiency, hyperazotemia, urethritis, acne and hemorrhoids.

Rhubarb has eupeptic, digestive, cholagogue and stomachic properties. It is useful in liver diseases, because it is able to evacuate bile.

Fumaria contains tannins, sugars, alkaloids (fumarin) and fumaric acid, it has aperitif, tonic, purifying, cholagogue, diuretic properties; it is useful as an adjuvant in psoriasis, dermatitis, allergic dermatosis, eczema, acne, pancreatic and renal insufficiency and cardio-renal edema.

The bitter fraction contained in Horehound is responsible for digestive and choleric virtues. The main components of the artichoke are: flavonoids, including cynaroside, responsible for the protective activity against the liver parenchyma, phenolic acids whose metabolites act on the tissues promoting diuresis and the elimination of metabolic waste, tannins and inulin, a sugar that our body can easily burn, therefore very useful for diabetics.

It also has diuretic, aperitif, digestive, tonic, eupeptic, blood-purifying properties and is a liver tonic. It can be useful as an adjuvant in liver failure, jaundice, liver cirrhosis, gallstones, gout, rheumatism, hypercholesterolemia and water retention. The active principles contained in Velloso are: flavonoids, tannins, curcins, polyphenolic acids, sesquiterpenes and manganese. Flavonoids play the role of promoting diuresis both quantitatively and qualitatively by increasing the elimination of chlorides and nitrates. The saponins contained in Sarsaparilla are responsible for the strong diuretic, azoturic and hypoazotemia action that the plant shows. The plant has a therapeutic action mechanism with two points of attack: the first is indirectly on the urea and nucleic metabolism, through an action at the liver level; the second is on the renal secretion mechanism, through a functional increase in the concentration powers of this organ. Sarsaparilla has given good results in the treatment of psoriasis, favoring the elimination of cholesterol.

### Ingredients

Water, alcohol, Burdock (*Arctium lappa* L.) rhizome 25%, Rhubarb (*Rheum officinale* Baill.) rhizome, Fumaria (*Fumaria officinalis* L.) tops, Horehound (*Marrubium vulgare* L.) tops, Artichoke (*Cynara scolymus* L.) leaves, White Mulberry (*Hieracium pilosella* L.) aerial parts, Sarsaparilla (*Smilax aspera* L.) rhizome, Senna (*Cassia senna* L.) leaves, Fennel (*Foeniculum vulgare* Mill.) fruits, honey, mixture of natural flavours.

Prices valid except for changes on our website. (IVA/VAT) included. Doc. Version bf-trf-G-20241121
