

## Capelvenere Compost 50 ml

EAN: 8023966200118

FABRICANTE: FORZA VITALE

*Maidenhair fern food supplement, promotes the fluidity of bronchial secretions*

### DESCRIPTION

Capelvenere has mainly expectorant properties; the plant contains tannins, gallic acid and essential oils. The leaves and stem of the plant are used. This plant can be useful as an adjuvant in coughs, bronchitis, asthma, colds, rheumatism and colic.

Poppy can be useful as an adjuvant in bronchitis, asthmatic dyspnea, insomnia and agitation in children. During early Christianity the effectiveness of Verbasco for cases of chronic cough was discovered. It contains approx. 3% mucilages, iridoids with anti-inflammatory properties, saponins with expectorant properties, flavonoids that promote the elimination of catabolites via the kidneys, digiprolactone, sterols, carotenoids, phenolic acids. From Lichen, the mucilages constituted by lime and isoliquenin, by hydrolysis give a sugar: galactose; which is a traditional adjuvant for bronchial forms and obstinate coughs.

Pine is mainly composed of monoterpene hydrocarbons and has anti-catarhal, antiseptic and balsamic properties. Pine essential oil is fully accredited among the most effective expectorant and balsamic oils, along with eucalyptus, mint and cajeput. Its properties are concentrated on stimulating not only the functionality of the airways but also the effectiveness of the muscle tone of the lungs.

Hyssop is very effective in respiratory disorders; its essence is mainly eliminated through the lungs. It thins mucus, promotes expectoration and resolves bronchial spasms. It is an excellent anti-inflammatory, useful in asthma, bronchitis, influenza and all catarrhal conditions.

Tolu Balsam is obtained from Myroxylon balsamum, a legume typical of Venezuela and Colombia, by extracting it from the bark of its trunk. It contains 75-80% of cinnamic acid esters with resinous alcohols and 20-25% of balsamic acids. It is used as an antiseptic, expectorant and balsamic in preparations for the throat and bronchi. Gold-Vitale® - Forza Vitale uses in its specific compounds mixtures obtained by a Spagyric-Alchemic elaboration, from plants characterized by a macrocosmic energetic signature, naturally containing traces of colloidal trace elements, in order to amplify the effect of the product on the specific organ or system in question.

These naturally obtained food additives act as a support to transport the biochemical principles of the extract and guarantee the energetic stability of the Spagyric product.

### Ingredients:

Water, alcohol, Maidenhair (*Adiantum capillus veneris* L.) aerial parts 50%, Poppy (*Papaver rhoeas* L.) petals, Primrose (*Primula veris* L.) flowers, Mullein (*Verbascum thapsus* L.) flowers, Icelandic lichen
