Cinnamon essential oil dietary supplement.

DESCRIPTION

In official medicine, Cinnamon essential oil is recognized as antibacterial, antifungal, digestive function stimulant and general tonic, as well as carminative and haemostatic. In aromatherapy, its aphrodisiac, orexigenic, cooling, antispasmodic and circulatory stimulant actions are highlighted. In the case of Compost Cinnamon, it is essential to refer to the energetic use of the plant, which has a Hot and Sweet flavour. Its anti-cold action develops at the level of TAI YANG, as it combats the harmful Cold that attacks the IG and the TR. In the case of Cold Vacuum of Rt, its propensity for use in women in case of amenorrhea stands out. The reference signature is that of the Moon. Let us introduce a fundamental aspect of the feminine: the cyclical “lunar” movement marked by the menstrual cycle, occurring in parallel with the phases of the Moon. It is an argument that women could be talking about endlessly, since it not only involves the physiology of the female body, but also has significant influences on the mood, reactivity, energies (physical and psychic), and desires of each woman. The menstrual cycle, as we know, consists of four phases: preovulatory, ovulatory, premenstrual and menstrual. The symptoms that accompany the cycle are diverse and so are the remedies, but none of these normally make use of the connection that a woman already naturally has with her uterus. It is therefore important to start over from within, because when a woman learns to understand her cycle, accepting the changes that it produces and being true to her nature, she can also regain her balance, which is different from woman to woman, but with an outcome that unites them all. The Moon and the menstrual cycle are strongly connected, the female body being sensitive to the lunar phases. The Moon represents par excellence the feminine principle, the alter ego of the Sun, the masculine principle. The lunar phases manifest principles of transformation and growth, just as it happens in the menstrual cycle. The Moon, in the human body, governs the stomach, the breast, the uterus, the ovaries, feminine functions in general, menstruation, fertilization and fertilization.

At the endocrinological level, the glands corresponding to the Moon are the gonads, linked to the reproductive and secretory fluid system. Silver Vitale® - Forza Vitale uses in its own compounds specific mixtures obtained by a Spagyric-Alchemic elaboration, from plants characterized by a macrocosmic energetic signature, naturally containing traces of colloidal trace elements, so as to amplify the effect of the product on the specific organ or system concerned. These naturally obtained food additives act as a support to transport the biochemical principles of the extract and guarantee the energetic stability of the Spagyric product. Silver is the metal of the Moon, used in ancient times to regulate menstrual flow.
