

Cynara Compost 50 ml

EAN: 8023966200187

FABRICANTE: FORZA VITALE

Food supplement made from yemoderivatives of artichoke, juniper and rosemary

DESCRIPTION

Hazelnut is rich in trace elements and tocopherol, which is why it is used to maintain the integrity of the biomembrane of the liver cell. Studies carried out in France have shown an intense anti-sclerotic action on the liver parenchyma.

Juniper, rich in bitter and digestive principles, is used as a defender of the liver cell, especially in cirrhotic processes with hepatomegaly. It has a normalizing action on the neurovegetative system.

It also has a high drainage action.

Rosemary has digestive and cholecystokinetic properties due to the active ingredients it contains (rosmarinic acid). Useful in liver failure, biliary dyskinesia, biliary lithiasis, hypertriglyceridemia, hypercholesterolemia, obesity. Tamarisk is a stimulant of hemopoiesis and spleen functions. Rye is a protector and regenerator of hepatocytes. Useful in both acute and chronic hepatitis as well as in liver cirrhosis.

Cynara is a stimulant of liver and biliary functions through the action of β -diphenols and flavonoids. It has the property of reducing cholesterol levels, thanks to the increase in the metabolic activity of hepatobiliary enzyme chains.

Useful in hepatobiliary conditions, hypercholesterolemia and hyperlipidemia.

Ingredients:

Water, glycerol, alcohol, macerates of: Hazel (*Corylus avellana* L.) buds, Juniper (*Juniperus communis* L.) buds, Rosemary (*Rosmarinus officinalis* L.) young shoots, Tamarix (*Tamarix gallica* L.) buds, Artichoke (*Cynara scolymus* L.) young shoots 3.6%, Rye (*Secale cereale* L.) young roots honey, mixture of natural flavours.
