

Fucus Compost 25 g

EAN: 8023966200286

FABRICANTE: FORZA VITALE

Fucus Food Supplement, stimulates metabolism.

DESCRIPTION

The feeling of satiety has always been a highly researched effect in herbal tradition. Fucus has laxative, emollient, expectorant and slimming properties. It is a greenish seaweed rich in iodine, for this reason it stimulates the thyroid and metabolic processes aimed at reducing excess fat and calories. The stem of this seaweed is used. Horsetail has diuretic, haemostatic, demineralising and anti-inflammatory properties. The plant contains salicylic acid, which gives elasticity to the tissues and is used in the reconstruction of the bone skeleton; saponin; tannins; resins; alkaloids (equisetin, nicotine, etc.); potassium; iron oxide and vitamin A; glutathione; pectin. Anise seeds can be considered valid regulators of digestive processes and carminative agents. Guar flour and glucomannan are rich in fiber, so by absorbing liquids they have a mechanical satiating action, also creating an increase in fecal mass, facilitating evacuation. Pineapple, from which the stem is used, contains bromelain, a group of various proteolytic enzymes. The main component of bromelain is a glycoprotein, with a molecular weight of 23,800, also called bromelain. As for the main proteolytic enzymes (among others papain), bromelain contains a thiolic group necessary for activity. Vellosoilla is a diuretic, azoturic, antimicrobial plant, effective for cellulite, obesity, diarrhea, brucellosis.

Ingredients:

Extracts and Powders of: Fucus (*Fucus vesiculosus* L.) stem 20.4%, Guar (*Cyamopsis tetragonoloba* Taub.) seeds, Horsetail (*Equisetum arvense* L.) sterile stems, Guggul (*Commiphora mukul* Hook) resin, Glucomannan (*Amorphophallus konjac*) rhizome, Pineapple (*Piña comosus* L.) stem, Green anise (*Pimpinella anisum* L.) fruits, vegetable magnesium stearate, microcrystalline cellulose, Vellosoilla (*Hieracium pilosella* L.) aerial parts, silica.
