*Food supplement made from bramble berry derivatives.*

### DESCRIPTION

Its tropism is directed towards the osteoarticular and pulmonary apparatus. It is indicated for obstructive respiratory failure with decreased FEV1 and pulmonary emphysema with increased residual respiratory volume.

Due to its osteoblastic properties, it finds therapeutic application in senile osteoarticular syndromes, characterized by osteoporosis.

**Ingredients:** Water, glycerol, alcohol, Bramble (*Rubus fruticosus* Lsl) young shoots 10%, honey.
