

Psc Acne Depurato 50 ml

EAN: 8023966994109 FABRICANTE: FORZA VITALE

Food supplement made from blackcurrant, elm, walnut and banana derivatives.

DESCRIPTION

Blackcurrant is a great systemic anti-inflammatory, adrenal and immune stimulant.

It has the property of preventing or inhibiting inflammatory states and allergic disorders. Its use in cases of eczema and dermatitis is expressed by the association with yemoderivatives of *Ulmus Campestris* and *Juglans Regia*.

The action of *Ulmus campestris* (Elm) is determined in the skin tissue by regulating the secretion of the sebaceous gland and acting on various conditions. It is capable of regulating the tendency of the organism in the reaction phases to transfer endogenous disorders to the skin in the form of non-infectious vesicular eczema (regressive vicariation).

Numerous studies confirm that *Ulmus campestris* in association with *Ribes nigrum* and *Juglans regia*, have a notable action against: cradle cap, acute eczema, eczematous flushes, transudative eczema, pustular dermatitis, vesicular eczema, impetigo, urticaria, cirrhous plagues, hidradenitis axillaris.

The buds of *Platanus orientalis* (Plantain), rich in quercetin and tannins, have a high tropism for the reticulo-epithelial system and represent an excellent anti-inflammatory remedy for the skin and epithelium. They contribute to exfoliation and the replacement of the epidermis. The action of this plant is superb in cases of acne induced by hormonal disorders, vitiligo, eczema, psoriasis and allergic urticaria.

Juglans regia (Walnut) buds have tropism for the skin and mucous membranes on which they play an important anti-inflammatory, antibacterial and healing action. In the dermatological field it is recommended for infectious eczema, psoriasis, pustular psoriasis, pustular acne, systemic lupus erythematosus, collagenosis, impetigo, scleroderma, dermatomyositis. Its action is enhanced by that of *Ribes nigrum* and *Ulmus campestris*.

Burdock is a plant known for its draining properties, especially at the skin level, where it is applied in numerous cases. It promotes the drainage of metabolic residues, which in the case of malfunctioning skin tissue, tend to accumulate, leading to epidermal inflammation and acne.

Ingredients: Organic Alcohol, vegetable glycerin, Organic black currant* (*Ribes Nigrum* L.) buds, Burdock SYS™ (*Arctium Lappa* L.) rhizome, Organic Walnut* (*Juglans regia* L.) buds, Organic Elm* (*Ulmus campestris* L.) buds, Organic Banana* (*Platanus orientalis* L.) buds.
