

PSC Allergy Depurato 50 ml

EAN: 8023966994116 FABRICANTE: FORZA VITALE

Food supplement made from concentrated yemoderivatives of blackcurrant, hornbeam and eyebright.

DESCRIPTION

Ribes nigrum is a powerful anti-inflammatory, stimulating the production of natural cortisone by processing adrenal function.

Blackcurrant is indicated for maintaining the well-being of the body and for the prophylaxis of infections, rhinopharyngitis, sinusitis, otitis and immune system disorders. The profound effect on the immune system is due to its ability to activate T-Helper cells. Regarding the endocrine system, blackcurrant stimulates the production of endogenous cortisone without the side effects and iatrogenic consequences of synthetic cortisone. Beech buds are the quintessential in stimulating immunoglobulins. They increase the number of T-Helper cells expressed by the CD4 value. Beech buds also contain cysteine, which acts as a protein inhibitor, inducing a decrease in viral cells in the blood.

Birch stimulates the immune system; in the case of pollinosis, the bud reduces the infiltration of eosinophils in the nasal mucosa, and contributes to maintaining lung function during the allergy season. Birch buds contain an active ingredient called Damnaran, a tetracyclic triterpene from the group of saponins, which performs an adaptogenic action by stimulating the body's ability to adapt to stress induced by any chemical, emotional or biochemical factor (including allergens).

The buds of Carpino have an elective action on the olfactory system, as they are capable of stimulating the cellular repair of the surface mucous membranes and relieving respiratory spasm. It restores respiratory function by dissolving the mucus that lines the upper part of the cavity; it inhibits interleukins 4 and 5, stimulating the increase of IL-12. Eyebright is a plant that has been used for a long time in the treatment of eye conditions, although there is a lack of relevant clinical and pharmacological studies, the plant is successfully used in the treatment of conjunctivitis, even of an allergic nature.

Propolis and quince have an anti-inflammatory action on the respiratory and bronchopulmonary system.

Ingredients: Alcohol, glycerol, Organic black currant* (Ribes nigrum L.) buds, Organic beech* (Fagus sylvatica L.) buds, Organic wild rose* (Rosa canina L.) young shoots, Organic hornbeam* (Carpinus betulus L.) buds, Organic birch* (Betula pendula var. verrucosa) buds, Eyebright (Euphrasia officinalis L.) whole plant, Quince (Cydonia oblonga Mill.) fruit, Propolis (Propolis).
