

## PSC Preventive Arrest 50 ml

EAN: 8023966994338

FABRICANTE: FORZA VITALE

*PSC Arresto Prevento. Food supplement made from concentrated yeast derivatives of Sambucus, Echinacea and Yarrow.*

### DESCRIPTION

Sambucus acts as a preventative, particularly against influenza strains. Patients treated with Sambucus Nigra have shown a higher presence of specific antibodies to the virus in the plasma and a decrease in symptoms.

The extract is also capable of promoting the production of anti-inflammatory cytokines TNF- $\alpha$ , IL-6, IL-1 $\beta$ , IL-8, making it a safe remedy for both the treatment of flu conditions and for preventive winter prophylaxis.

Echinacea is a concentrate of phytochemical constituents useful for the prevention and treatment of flu-like symptoms thanks to its immune system-stimulating action: The roots of the Echinacea purpurea variety, rich in alkylamides, are useful for a preventive blockage of flu symptoms. For a higher concentration of alkylamides in the final extract, the roots of Echinacea must be prepared in an alcohol content equal to at least 60%. The action of modulating the immune response should be related, at least in part, to the interaction of alkylamides with CB2 receptors; Echinacea also promotes an increase in the count of natural killer cells, an integral part of our immune system.

Feelings of exhaustion, aching joints, poor concentration and fatigue often precede colds and flu.

Yarrow, long known for its tonic properties, is a universal agent useful for the prevention of the most common winter ailments. It contains substances belonging to the group of sesquiterpene lactones, responsible for its preventive and supportive action in cases of cold symptoms. These substances stimulate the immune function, enabling it to more quickly confront attacks from external agents.

Achillein, another phytochemical component, acts on blood vessels by decreasing the flow of blood to the mucous membranes, making them less permeable to viruses and bacteria.

**Ingredients:** Alcohol, bio, glycerol, Organic Sambucus\* (Sambucus nigra L.) buds, Organic Echinacea\* (Echinacea purpurea Moench.) roots, Organic Yarrow\* (Aquilegia millefolium L.) young shoots.
