

*Condurango Food Supplement, promotes the well-being of the digestive system.*

### DESCRIPTION

Dolomite powder is made up of calcium and magnesium carbonate and is capable of making the acidic environment of the stomach basic (antacid).

Of the licorice, only the rhizome is used; it contains glycyrrhizic acid, liquirrhitin, glucose, gum, resin, starch, magnite, saponin, tannins, vitamins of group A and phytohormones. It is a powerful anti-inflammatory and decongestant, used in the treatment of ulcers.

Agar-Agar is a mucilaginous substance prepared by various types of algae from the seas of China and Japan. It is a heterogeneous polysaccharide consisting mainly of agarose and agaropectin and, like all mucilaginous substances, it is an excellent emollient and anti-inflammatory.

This substance has the property of swelling in the intestine, increasing the volume of the fecal bolus and thus activating peristaltic movements in order to cause easier evacuation of feces without causing irritation.

The seeds of anise are used for their digestive, carminative and sedative properties for nervous spasms.

Angelica roots are used mainly for their resins, tannins and essential oil. It has stomachic, antacid and digestive properties.

The cumin seeds are used for their digestive, antacid and carminative properties.

**Ingredients:** Dolomite (32.5%), magnesium carbonate, Valerian (*Valeriana officinalis* L.) rhizome, Agar-agar (*Gelidium amansii* JVLamouroux) stem, Condurango (*Marsdenia condurango* Nich.) bark, Licorice (*Glycyrrhiza glabra* L.) rhizome, Green anise (*Pimpinella anisum* L.) fruits, Angelica (*Angelica archangelica* L.) rhizome, Cumin (*Cuminum cyminum* L.) fruits, microcrystalline cellulose, vegetable magnesium stearate.
