

Turmeric Food Supplement, promotes the functionality of the digestive system and the well-being of the gallbladder.

DESCRIPTION

It has choleric, cholagogue, biliary spasmolytic, antiphlogistic properties for the biliary tract, eupeptic, antidyspeptic, hepatoprotective, carminative, and antibacterial properties. It is a very notable remedy for digestive difficulties, since it simultaneously improves the intestinal bacterial flora. It is also used to resolve minor liver insufficiencies and intoxications, where it activates the excretory organs and biliary lithiasis.

Among its constituents we find curcuminoids, which have notable antiphlogistic properties, an essential oil composed of sesquiterpenes, turnerón, and jingiberene.

Ingredients: Water, alcohol, Turmeric (Curcuma longa L.) rhizome 20%, honey.
