

Licorice Food Supplement, promotes the functionality of the digestive system.

DESCRIPTION

The used part is represented by the underground organs of the plant. They contain various active ingredients, up to 15% of triterpene saponins such as glycyrrhizin and hydroxyglycyrrhizin, glabramin A and B, glycyrrhetol, triterpenes and sterols, more than thirty flavonoids and isoflavonoids and curarins. Saponins are responsible for the secretolytic and secretotransitory action in bronchial coughs and catarrhs and in inflammations of the upper respiratory tract; they also have a bacteriostatic and antiviral action, as well as an antiphlogistic and spasmolytic action in gastritis and gastric ulcers. It has beneficial, antispasmodic, emollient, anti-inflammatory and decongestant properties. For external use, it is useful for smokers to soothe irritations in the oral cavity and clear the voice. Licorice also stimulates intestinal functions, it is a good purifier, with a high sweetening and emulsifying power.

Ingredients: Water, alcohol, Licorice (*Glycyrrhiza glabra* L.) root 20%, honey.
