

*Orange Food Supplement, promotes digestive function.*

### DESCRIPTION

The orange tree is a tree with oval leaves with smooth or slightly serrated edges; the color is shiny green. There are many varieties of orange trees, such as sweet and bitter.

When we think of oranges, we immediately associate them with vitamin C and its anti-flu power. It contains citral, citronella, linalol, methyl ketone and nerols.

The orange is a fruit with multiple virtues, such as disinfectant, soothing, tonic-mineralizing and vermifuge.

Not only the fruits of the orange tree are used, but also the leaves, bark and flowers, which have remarkable properties, including aperitifs, digestive, aromatic, sedative and antispasmodic properties.

### Ingredients:

Water, alcohol, Orange tree (*Citrus sinensis* L. var. *dulcis*) flowers 20%, honey.
