

Sys Pilosella 50 ml

EAN: 8023966700533

FABRICANTE: FORZA VITALE

Vellosilla Food Supplement, promotes the drainage of body fluids.

DESCRIPTION

The active principles contained in this plant are: flavonoids (luteoloside, glucoside and some apigenin), tannins, curarins (piloselin), polyphenolic acids (caffeic acid and chlorogenic acid), triterpene saponins, sesquiterpene saponins and manganese.

Flavonoids have a diuresis-promoting action both quantitatively and qualitatively (increasing the elimination of chlorides and nitrates); polyphenols and curarins have a strictly antibiotic and spasmolytic action.

This plant, used in its entirety for the preparation, can be useful as an adjuvant in urinary lithiasis, water retention, hyperazotemia, oliguria, renal inflammation, cystitis, polyuria, obesity and gout.

Ingredients: Water, alcohol, Vellosilla (*Hieracium pilosella* L.) aerial parts 20%, honey.
