

Cat's Claw Food Supplement, supports the body's natural defenses. The vital support for your well-being.

DESCRIPTION

Uncaria tomentosa can be used to speed up the healing process. Among other substances, this plant contains various alkaloids, glycosides, triterpenes, avonoids and tannins, which have antiviral, antibacterial, antirheumatic and pain-relieving effects. In this plant, the totality of its active principles is very important. We are still far from knowing the entire field of applications of Uncaria, which is widespread in Peru and known by the natives under the name of Cat's Claw. Pharmacological tests have shown that the pentacyclic oxidative alkaloids of the plant are endowed with immunostimulating and immunomodulating activity. In interesting applications in the oncological field, it also seems that the active principles of Cat's Claw are effective against DNA polymerase and reverse transcription of viruses.

Ingredients

Water, alcohol, Cat's claw (Uncaria tomentosa Willd.) bark 20%, honey.

Instructions for use

Adults (Recommended dosage for subjects of normal weight) 25 drops 3 times a day.

Up to 12 years (Recommended dosage for subjects of normal weight) 10 drops 3 times a day.
