*Ineldea laboratories develops different brands, including the Pediakid brand. Pediakid is the first range of natural health products. Pediakid is made with 100% natural active ingredients. Pediakid offers us solutions for minor conditions of the smallest, such as immunity, sleep, appetite, growth, intestinal transit.*

## DESCRIPTION

Ineldea has several ranges of products, including the Pediakid range. Pediakid is a range of natural products for the health of our little ones. Pediakid are 100% natural active ingredients that offer us all kinds of solutions for our children's medical conditions, such as intestinal transit problems, lack of appetite, sleep disturbances, immune system, among others.

All **Pediakid food supplements** contain the best associations of active ingredients to combine efficacy and bioavailability:

- The active plant extracts present in the Pediakid range are rigorously selected for their recognized properties and their mild action.
- All Pediakid products contain prebiotics of natural origin: soluble fibers from acacia, rebalancing the intestinal flora. In children, the intestinal flora is immature and especially sensitive to disturbances.
- The inclusion of natural fruit concentrates in the syrups makes them more pleasant to taste, perfectly adapted to the taste of children.

Pediakid products contain Agave nectar: sweeter and less thick than honey, it is a plant-based sugar:

- It is made up of unrefined natural sugars, which give it specific nutritional qualities.
- Acacia fibers help enhance the benefits of agave nectar: well tolerated by children, they favor the growth of good bacteria in the intestine.
