Intersa is dedicated to dietetics, nutrition, herbal medicine, aromatherapy and cosmetics. All the products of interest are certified as organic.

DESCRIPTION

Intersa is a laboratory that has been in the market since 1977, producing natural remedies, phytotherapy, yemotherapy, oligotherapy, phytonutrients, all of them produced and processed following the rules of organic farming.

BIO phyto-yemo-aromatherapy is based on the use of plant extracts and fresh yolks together with the integrative power of essential oils obtained by steam distillation.

Plant extracts and buds, as well as essential oils, are obtained from fresh plants of certified organic production.

The extracts are obtained through the different extractive forms that allow them to obtain a greater quantity and quality of the different components from fresh plants from selected and certified organic crops.

They preserve all the fresh juice of the plant, the fruit of the root or the bud and join the action of the most valued botanically and biochemically essential oils, which gives rise to unique extracts in which nature is packaged in its state. purest: Phytoactives, sap and juice from the fresh plant.
