

Phytojunior 3 Digest Bio 30 ml

EAN: 8413568008241 FABRICANTE: INTERSA

Phyto-Junior 3 Digest Bio by Dietéticos Intersa is a food supplement that provides carminative, digestive, antispasmodic, protective and soothing properties of the digestive mucosa.

DESCRIPTION

The plant extracts it contains (anise seeds (*Pimpinella anisum* L.), fennel (*Foeniculum vulgare* Mill.), chamomile (*Matricaria chamomilla* L.) and marshmallow root (*Althaea officinalis* L.)) provide carminative, **digestive**, **antispasmodic**, protective and softening properties of the **digestive** mucosa.

The hydroglycerin macerates of fresh buds it contains (fig (*Ficus carica* L.), linden (*Tilia tomentosa* Moench) and walnut (*Juglans regia* L.)) help to promote the digestive process and reduce psychosomatic aspects. Fig buds help to assimilate the aspects that we find difficult to “digest” in our lives, contributing to the process of acceptance and change and to the reduction of digestive spasms.

Its synergy of essential oils (organic mandarin (*Citrus reticulata* Blanco), organic Roman chamomile (*Chamaemelum nobile* L.), organic fennel (*Foeniculum vulgare* Mill.) and organic marjoram (*Origanum majorana* L.)) helps to intensify the antispasmodic and carminative effects and facilitate the digestive process.

In addition, this unique alcohol-free complex also contains an organic red grape concentrate that gives it a very pleasant taste.

Directions:

- Mild spasmodic digestive disorders.
- Adjuvant in cases of gastroenteritis and infectious diarrhea.
- Digestive failure and malabsorption syndrome.
- Gastrointestinal pain.
