

Osteo Atrion 30 sticks

EAN: 8437011373953 FABRICANTE: JELLYBELL

Osteo Atrion is a dietary supplement based on Micellar Calcium, vitamin D2 and vitamin K2 for perfect nutrition and care of your bones.

DESCRIPTION

Osteo Atrion Jellybell contains the Osteum complex, a highly bioavailable ingredient for bone health that restores the balance between bone formation and degradation, promoting joint flexibility and mobility without pain.

Amount provided per daily dose (1 stick): 120 mg Calcium (15% NRV), 2,500 mg Osteum? which provides: 55 mg Micellar Calcium, 11.25 µg Vitamin K (15% *NRV) and 0.75 µg Vitamin D (15% *NRV).

*NRV: Nutrient reference value.

Osteum?

It is a patented combination of natural active ingredients, brought together in it. These components have a synergistic action, which allows them to act as adjuvants to enhance bone mineralization, and increase bone mass, thus promoting its regeneration, which contributes to good health of the individual:

Native Micellar Calcium:

It is the main active component of Osteum? (raw material of OsteoAtrion). It is a dairy ingredient and the most bioavailable form of calcium to date. It contains natural substances present in milk, which not only help the direct bioavailability of calcium, but also modulate gastrointestinal motility, which indirectly influences its bioavailability, which means that OsteoAtrion allows a greater absorption of minerals in the bone than any other ingredient available on the market. It is therefore a unique product capable of reducing bone degradation, allowing mineralization, through the stimulation of the activity of the cells responsible for these regeneration processes (osteoblasts).

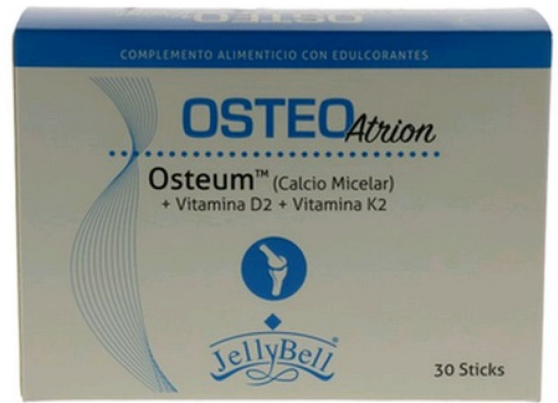

Micellar calcium is composed of casein micelles, which are made up of 92% casein and 8% colloidal calcium phosphate. These micelles contain 80% of the total milk protein. The formation of casein micelles depends on the interaction phenomena established between them in the presence of calcium ions. According to the literature, the composition and primary structure of caseins give them important physicochemical properties of functional interest.

It is clinically proven that, thanks to its structure and composition, our micellar calcium from Osteum? has

a complete action on the bone remodeling mechanism. Thus contributing to good skeletal health by increasing bone mineralization and restoring the balance between bone degradation and regeneration, thus limiting the risk of contracting fractures due to osteoporosis.

Vitamin D2:

Vitamin D2 or Ergocalciferol comes from natural sources. It regulates calcium and phosphate concentrations, stimulates the absorption of these minerals in the small intestine and mobilizes calcium in the bone. Its deficiency causes rickets in children and osteomalacia in adults.

Vitamin K2:

Vitamin K2 is of plant origin. It helps prevent osteoporosis and preserve bones by stimulating and increasing the production of osteocalcin (bone tissue regenerator) and inhibiting osteoclasts (responsible for the resorption of the bone matrix). Thus, vitamin K promotes the distribution of calcium only in bone tissue, thus preventing arterial calcification.

Calcium

A lack of calcium in human bones facilitates the appearance of diseases such as osteoporosis. Calcium is a mineral with many properties. It nourishes the bones, prevents osteoporosis and even relaxes muscles. It is the mineral with the highest presence in the body, and the fourth largest component of the body, after water, proteins and fats.

Vitamin D

The main function of vitamin D in the body is to maintain normal levels of calcium and phosphorus circulating in the blood. This nutrient also helps absorb calcium in the bones and, alone or in combination with calcium, increases bone mineral density and helps reduce fractures.

Vitamin K

Vitamin K is a fat-soluble vitamin, known for its important role in blood clotting. However, vitamin K is also absolutely essential for building strong bones, preventing heart disease, and a crucial part of other bodily processes.

Instructions for use:

Prices valid except for changes on our website. (IVA/VAT) included. Doc. Version bf-trf-G-20241121
