

Salt Salys KS N6 90 tablets

EAN: 8437011373236 FABRICANTE: JELLYBELL

K and S compounds act on the renewal and construction of new cells.

DESCRIPTION

K and S compounds act on the renewal and construction of new cells. It stimulates tissue drainage, especially the cells of the dermal tissue (epithelial, epidermis). This compound has an affinity for mucous membranes and acts by draining all tissues. Together with iron, they provide oxygen to the tissues and act on transpiration or gas exchange. Intervenes on Chondroitin Sulfate in the synthesis of collagen for the formation of mucous membranes. It regenerates the hepatocyte, improving the production of bile salts. It intervenes in the metabolic pathway of proteins and participates in the structure of some organic enzymes, such as those of the vitamin B group.

SUGGESTIONS

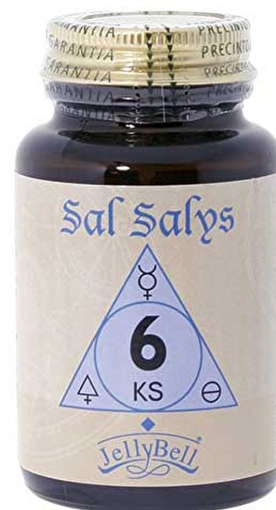

In all mucosal problems.
Third stage of inflammation (Mucopulmonary secretions).
Asthmatic bronchitis or with thick yellow-green exudation.
Nasal catarrh with thick mucus.
