

Salys Salt 8 NaCl 90 tablets

EAN: 8437011373267 FABRICANTE: JELLYBELL

Na and Cl compounds act specifically on the SPLEEN, intervening in the metabolism of all organic fluids: lymph, blood, intracellular and extracellular fluids. OSMOTIC balance.

DESCRIPTION

Na and Cl compounds act specifically on the SPLEEN, intervening in the metabolism of all organic fluids: lymph, blood, intracellular and extracellular fluids. (OSMOTIC Balance).

It is the most important constituent compound of blood and extracellular fluids, along with K and P.

It regulates the entry and exit of fluids in the tissues, allowing soluble substances to pass through the cell membranes of the lymphatic vessels, blood vessels and other cells.

It regulates and increases the exudative activity of the tissues, correcting the disturbances of the glands of the intestines, skin and mucous membranes.

It participates in the lysis of proteins, thanks to the hydrochloric acid produced by the union of the Chlorine atom with the Hydrogen atom. Sodium combines in the body in the form of Sodium carbonate.

It catalyzes cell genesis and stimulates the formation of erythrocytes.

SUGGESTIONS

All types of ailments caused by excessive watery discharges or, by default, those that create dryness in the mucous membranes: dry or watery rhinitis, loss of taste, loss of smell (anosmia).

Very useful in certain types of constipation (goat feces).
