

Natural Henna with Amla and Red Jatropha 100 gr

EAN: 4260378040114 **FABRICANTE:** KHADI

Dip your hair in a striking, deep, dark red, like ripe, dark cherries.

DESCRIPTION

Provides an intense shine with bright red reflections.

Permanent and natural colors. Nourishes and strengthens hair and scalp thanks to finely ground and hand-selected Ayurvedic active ingredients, without the use of harmful chemicals.

Elegant like heavy red velvet and seductive like ruby red Burgundy wine. Dive into the mysterious world of our opulent deep red full of mystical depth and elegant sophistication. Experience the magic, enjoy the stylish elegance of your new deep red hair color with all its secrets and give your hair a noble and timeless look.

Khadi Henna, Amla & Jatropha is ideal for permanent hair colouring and allows your hair to naturally revive with healthy vitality. The individual result depends on the initial natural colour of your hair.

The secret of our hair dyes lies in the combination of high colour intensity and Ayurvedic care. According to Ayurvedic principles, we only harvest the plants once a year, exactly when the pigments reach their maximum potency. We use only the best parts of hand-selected plants, without stems or stalks, and grind them into an ultra-fine powder using an innovative process.

Unlike synthetic hair dyes, where oxidising agents cause the hair to swell to open the outer layer of the cuticle for the pigments, in khadi herbal hair dyes the pigments envelop each individual hair like a protective layer. Thanks to the Ayurvedic care of our ingredients, hair and scalp are nourished, vitalised and strengthened by the colouring. The result: beautiful, healthy hair that you can feel and see.

Khadi plant hair dyes are 100% natural, contain no synthetic colours, fragrances or preservatives and are all certified vegan except for two shades. Why is a product not vegan? Each batch is tested for microbiology, heavy metals and pesticides.

The package includes detailed instructions, color powder, hat and gloves.

Easy to use

Water at 80-90°C

Leave to act for 120 minutes.

Prices valid except for changes on our website. (IVA/VAT) included. Doc. Version bf-trf-G-20241216

Easy to use. Wonderful effect. khadi Henna, Amla & Jatropha is the ideal choice for anyone who wants to combine a permanently intense colour experience with natural care without harmful chemicals. We will guide you step by step:

Wash your hair thoroughly beforehand with a naturally certified shampoo, preferably khadi DeepCleanse shampoo.

Mix the henna, amla and jatropha powder with warm water at 80-90 degrees until it becomes creamy and all the powder particles have completely dissolved. Allow the cream to cool briefly. You can now apply it evenly to your hair, strand by strand, using a brush or with your hands (wear the gloves provided and preferably face down in the shower or over the bath). If you only want to dye your roots, skip the lengths and tips.

Leave the color on for 60-120 minutes. The longer it works, the darker the color result will be. If you have already dyed your hair with this shade and just want to refresh your color, leave the color on your hair for 15-30 minutes.

Rinse the herbal hair color with clean water after the reaction time. Avoid using shampoo for 24 to 48 hours so that the full depth of your shade's color can develop during this time.

Aftercare tip: Use khadi ColorFinish Conditioner immediately after rinsing the colour with water to rinse out any remaining colour particles and make styling easier. After the exposure time has elapsed, rinse the hair thoroughly again with lukewarm water.

Tip for a perfect finish: Before you wash your hair for the first time after 24-48 hours, we recommend that you fix the colour pigments in your hair with khadi ColorCare hair oil. This means that your khadi shade

Natural Henna with Amla and Red Jatropha 100 gr

EAN: 4260378040114 FABRICANTE: KHADI

lasts much longer and the colour depth is intensified. To do this, distribute the oil evenly throughout your hair and leave it to work for at least 20 minutes. Then wash it out with a silicone-free, natural shampoo, for example our khadi AMLA VOLUME.

Find information on the perfect application here: [khadi ColorCycle](#)

Note: Every hair is unique, just as we are all different. Carefully test your herbal hair color on a discrete sample strand to achieve the best results for your individual hair.

Of course! Here is the table translated into Spanish, keeping the original structure:
