

Artichoke 180 Tablets

EAN: 5055148413743 FABRICANTE: LAMBERTS

Artichoke is indicated for the correct maintenance of liver functions and to prevent imbalances that may reduce the quality of our body's performance.

DESCRIPTION

The use of artichoke in herbal medicine was first described in the 4th century BC. There is evidence of its use since the times of the Egyptian civilization for nutritional and therapeutic purposes.

This plant belongs to the Asteraceace family, which also includes Milk Thistle.

Also known as the globe artichoke, this plant produces large purple and green flowers and is different from the Jerusalem artichoke, an edible root vegetable.

Traditionally, artichoke extract has been used to relieve the discomfort experienced by some people after meals. It is the leaves of the artichoke that contain the active components, the most important of which is cynarin.

Cynarin and artichoke flavonoids, including luteolin, are powerful antioxidants that represent the main benefits of artichokes.

Artichoke extract standardized to 5% cynarin, which provides a relevant amount of 16 mg of cynarin per tablet.

Oval tablet with green coating.

Each tablet provides:

Artichoke	7.425 mg
(as 330 mg of a 25:5:1 extract)	
providing Cynarin	16 mg

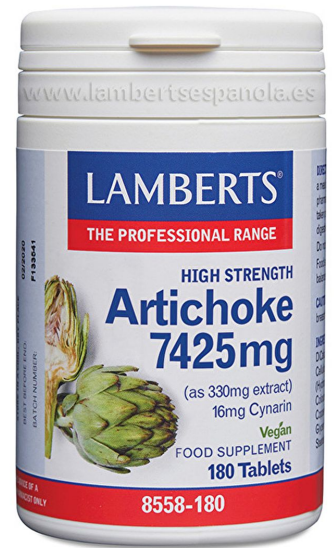

Suitable for vegetarians and vegans and free of lactose and gelatin.

Allergen note

Artichoke 180 Tablets

EAN: 5055148413743 FABRICANTE: LAMBERTS
