

## Calcium Pantothenate LS 60 Capsules

EAN: 5055148401368

FABRICANTE: LAMBERTS

*Pantothenic Acid or Vitamin B5 as Calcium Pantothenate 500 mg. Sustained Release. Contributes to normal intellectual performance.*

### DESCRIPTION

The name Calcium Pantothenate, or pantothenic acid, comes from the Latin word "panthos," which means everywhere. This nutrient is also known as vitamin B5 and is found in many foods, such as fish, poultry, whole grains, yogurt, etc. and legumes are the best sources of pantothenic acid.

Pantothenic acid is a component of coenzyme A, essential for the release of energy from food.

It is also involved in the production of antibodies and is therefore important for the immune system.

Pantothenic acid is essential for the production of cortisone by the adrenal glands. This corticosteroid hormone is needed to help the body cope with stress.

Our Pantothenic Acid supplement is highly concentrated and manufactured in the UK under GMP pharmaceutical standards.

Sustained Release Formulation: The tablets are formulated to be sustained release, so that the vitamin B5 is released gradually over a period of 6 to 8 hours after being ingested. This form is more compatible with the way a nutrient is released from food during digestion.

Pantothenic acid plays a role in the processes that release energy from food, and contributes to normal mental functioning.

It also contributes to the normal synthesis of natural steroid hormones and neurotransmitters.

Like many of the B vitamins, it also contributes to the reduction of fatigue and tiredness and to normal intellectual performance.

Oval brown coated tablet.

### Each tablet provides:

Pantothenic Acid (as Calcium Pantothenate)

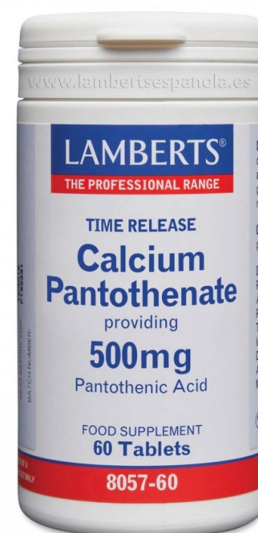

500 mg
